Change to the IJF Editors

There has been a change in editors at the IJF. Paul Goodwin has retired from the editorial board, and Dilek Önkcal has taken his place.

Paul Goodwin was appointed as an associate editor in 1999 and as an editor in 2010. Paul is retiring from his position as Professor of Management Science at the University of Bath, UK, and has decided to also retire from the IJF editorial board. Paul's research interests are primarily concerned with the role of judgment in forecasting and decision making, and with forecasting support systems. His two most highly cited papers both appeared in the IJF: "Judgmental forecasting: a review of progress over the last 25 years" (Lawrence, Goodwin, O'Connor, & Önkcal, 2006) and "Effective forecasting and judgmental adjustments: an empirical evaluation and strategies for improvement in supply-chain planning" (Fildes, Goodwin, Lawrence, & Nikolopoulos, 2009). He has provided wonderful service to the IJF in handling a very diverse range of papers. Thanks to Paul for his many contributions, and best wishes for the future.

Dilek Önkcal has been an associate editor of the IJF since 2002, covering many topics including judgmental forecasting, psychological aspects of forecasting, organizational aspects of forecasting, forecasting support systems, and supply chains. She is a Professor in the Faculty of Business Administration at Bilkent University in Turkey, and until a few months ago was Dean of the faculty. Dilek is a coauthor with Paul Goodwin of the highly cited review paper on judgmental forecasting (Lawrence et al., 2006). She has also authored numerous well-regarded papers on judgmental forecasting, especially in the area of probabilistic forecasts. I am delighted that she has agreed to take on greater responsibility on the editorial board, and welcome her to the team of IJF editors.

In 2015, the five IJF editors are: Rob J. Hyndman, Dick van Dijk, Graham Elliott, Dilek Önkcal and Esther Ruiz.
